HALSANG MOBILE FENCE

Mobile solutions for construction sites, events, temporary security solutions, etc.

ADVANTAGES

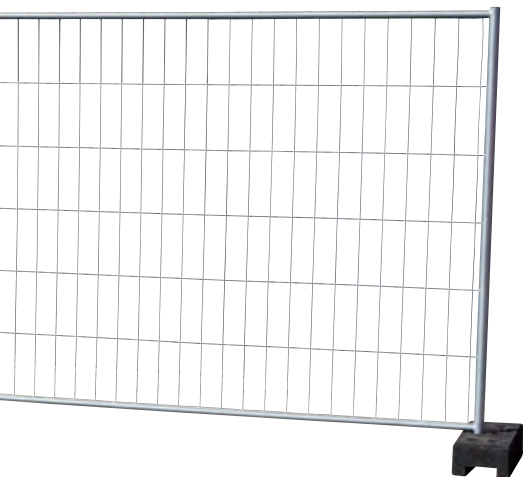

QUALITY

Halsang offers building fencing with unique construction and very high quality.

- The panels are available in widths 3.5 m or 2.2 m.
- Heights: 2 m and 1.1 m
- Hot galvanized execution after welding.
- Hand-welded mobile panels with 360 degree welding.
- "Tube-in-Tube welding". All horizontal pipe profiles are fully welded into the vertical tubes, which provides high stability and extremely strong corners.

LIFETIME

Halsang mobile fences have a significantly longer lifetime compared to traditional mobile fences made in pre-galvanized execution, which leads to a significantly better overall economy. Halsang building fence panels eliminate the problem of loose/breaking weldings.

"TUBE-IN-TUBE WELDING" AND HOT DIP GALVANIZED
